

Income inequality is one of the hottest topics on the planet. The haves and the have not's. The 1% and the 99%. The Wealth Gap. It was listed as the number one global risk by the World Economic Forum 2014 meeting in Davos Switzerland.

Wealth Migrate is leading the Wealth Movement and wants to inspire growth and change globally. The Wealth Movement is inspired by this prose:

Imagine a world...

A world where most or all people are literate

A world where education is par for the course

A world where woman are treated as equals

A world where all people have access to (investment) opportunities

In this world children will grow up in a family and raised in a home their parents own.

Because of this, they will be healthier and have access to healthcare facilities and caregivers. They live in less stressful environments with less conflict in their home

Imagine a world where 6 billion people on the planet that currently live in poverty can live a better life ...

Even if we can only help a billion in the next 5 years...

Imagine that world

The wealth movement wants to create that world!

We will reach out to all technology companies, governments and 21st century thinking individuals and companies to join the movement, have a purposeful impact and make the mission a success, to empower a further billion people with the wealth effect through real estate by 2020. The future of our planet relies on it and as Abraham Lincoln said, it is the easiest way to ensure a sustainable future.

This is our destiny and will lead the Wealth Movement in, "Creating a sustainable and better planet for all!"
